The contribution paid/payable under the schemes is recognized during the period in which the employee renders the related service.

**d) Defined Benefit plan:**

The obligation under defined benefit plan is accounted as per the estimation provided by the Management. Accordingly, during the year, the Management has provided Rs.Nil towards estimation of Gratuity payable.

**o) Earnings per share:**

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

**p) Leases:**

A lease of assets where the risk and rewards of ownership are transferred by the owner by the end of the lease term is capitalized as finance lease. Assets taken on finance lease are capitalized at fair value or net present value of the minimum lease payments, whichever is lower. Depreciation on the assets taken on lease is charged over the primary period of the lease. Lease payments made are apportioned between the finance charges and reduction of the outstanding liability in respect of assets taken on lease, based on the interest rate implicit in the lease

Other leases are operating leases and the leased assets are not recognized in the Company's Balance Sheet. Lease expenses on such operating leases are recognized in the Statement of Profit and Loss on a straight-line basis over the lease term. Initial direct costs are recognized as an expense in the Statement of Profit and Loss in the period in which they are incurred

**q) Impairment of Asset:**

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its

disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased

**r) Provisions and contingent liabilities:**

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is there, for that provision is made.
